spring Objective Questions and Answers (SET - 1)

Please attempt at least 12 objective questions to see test result.

1) Which of the following is correct about dependency injection?

A - It helps in decoupling application objects from each other.

B - It helps in deciding the dependencies of objects.

C - It stores objects states in database.

D - It stores object states in file system.

- ☒ A
- ☐ B
- ☐ C
- ☐ D

2) What is Advice?

- ☐ This is the way to instruct object to behave in certain manner.
- ☐ This is used to inject values in objects.
- ☒ This is the actual action to be taken either before or after the method execution.
- ☐ This is not invoked during program execution by Spring AOP framework

3) What is a DispatcherServlet?

- ☐ DispatcherServlet is used for transaction management.
- ☐ DispatcherServlet is used for AOP.
- ☒ DispatcherServlet handles all the HTTP requests and responses.
- ☐ DispatcherServlet is used for Dependency injection.

4) What are the ways to access Hibernate by using Spring?

- ☐ Inversion of Control with a Hibernate Template and Callback.
- ☐ Extending HibernateDAOSupport and Applying an AOP Interceptor node.
- ☒ Both of above.
- ☐ None of above.

5) What is global-session scope?

- ☒ This scopes a bean definition to an HTTP Application/ Global session.
- ☐ This scopes the bean definition to Spring IoC container.

Recommended

[Spring interview question](#)[Hibernate interview question](#)[spring hibernate integration javaconfig](#)[spring angularjs integration](#)[Spring Junit Integration](#)

- ☐ This scopes the bean definition to HTTP request.
- ☐ This scopes the bean definition to HTTP Session.

6) Which of the among is not a special bean in `WebApplicationContext`?

- ☐ `LocaleResolver`
- ☐ `ThemeResolver`
- ☐ `HandlerMappings`
- ☒ `None of the above`

7) What could not return a Spring MVC controller ?

- ☒ `An absolute path to the view`
- ☐ `A new JstlView`
- ☐ `void`
- ☐ `null value`

8) Where do you cannot declare Spring MVC controller?

- A. In a Spring application context XML configuration file
- B. Into the `web.xml` file of the web application
- C. Into the java code by using annotations
- D. Into the JSP pages

- ☐ A,C
- ☐ B,C
- ☐ A,D
- ☒ B,D

9) How the spring `DispatcherServlet` supports for returning the last-modification-date ,as specified by Servlet API?

- ☒ `By implementing the LastModified interface`
- ☐ `By implementing the LastSessionModified interface`
- ☐ `By implementing the LastDateModified interface`
- ☐ `By implementing the LastModifiedDate interface`

10) Which of these statement is false regarding the given `handlerMappings`?

- ☐ **`BeanNameUrlHandlerMapping`** ? Maps controllers to URLs that are based on the controllers? bean names.
- ☐ **`ControllerBeanNameHandlerMapping`** -Maps controllers to URLs that are based on the controllers? bean names.
In this case, the bean names aren?t required to follow URL conventions.
- ☐ **`ControllerClassNameHandlerMapping`** ? Maps controllers to URLs by using the controllers? class names as the basis for their URLs.
- ☒ **`SimpleUrlHandlerMapping`** ? Maps request to controller and controller methods that are annotated with `@RequestMapping`.

11) Which `handlerMappings` are being used by default if no `handlerMapping` beans are found?

- ☒ `BeanNameUrlHandlerMapping`

- ☐ DefaultAnnotationHandlerMapping
 - ☐ ControllerBeanNameHandlerMapping
 - ☐ SimpleUrlHandlerMapping
-

12) Which is not a view in Spring Web Flow?

- ☐ Action
 - ☐ Decision
 - ☐ End
 - ☒ Start
-

13) What is ContextStartedEvent event?

- ☐ The event is published when the servlet context is either initialized
 - ☐ The event is published when HTTPRequest is received
 - ☒ The event is published when ApplicationContext is started using the start method on the Configurable ApplicationContext interface
 - ☐ The event is published when HTTPResponse is returned
-

14) Which is not a MethodNameResolver ?

- ☐ ParameterMethodNameResolver
 - ☐ InternalPathMethodNameResolver
 - ☒ XMLMethodNameResolver
 - ☐ PropertiesMethodNameResolver
-

15) How could you externalize constants from a Spring configuration file or a Spring annotation into a .properties file?

- ☐ By using the tag
 - ☐ By declaring the ConstantPlaceholderConfigurer bean post processor
 - ☒ By using the tag
 - ☐ By using the c: namespace
-
